

flex(연습 문제)

Froggy = <https://flexboxfroggy.com/#ko>

flex defense = <http://www.flexboxdefense.com/>

문제 - flex로 메뉴만들기

HTML

```
<ul class="navigation">
  <li><a href="#">Home</a></li>
  <li><a href="#">About</a></li>
  <li><a href="#">Products</a></li>
  <li><a href="#">Contact</a></li>
</ul>
```

CSS (flex를 사용하지 않은 버전)

```
body, ul, li {
  margin:0;
  padding:0;
  list-style:none;
}

a {
  color:inherit;
  text-decoration:none;
}

.navigation{
  background-color:#afafaf;
```

```
        text-align: right;
    }

    .navigation > li{
        display:inline-block;
    }
    .navigation > li > a{
        display:block;
        padding:20px;
        font-weight:bold;
    }
    .navigation > li:hover > a{
        color:white;
        background-color:black;
    }
}
```

flex를 사용한 버전
